PRESS RELEASE

Particle Sciences Sponsors Dr. Qiuxi Fan's Podium Presentation on the Latest Developments in Iontophoretic Drug Delivery at the 2008 Annual AIChE Meeting

Bethlehem, PA, August 26, 2008 - Particle Sciences, Inc., a Pennsylvania-based pharmaceutical contract research organization specializing in the development of semi-solid dosage forms, will sponsor Dr. Qiuxi Fan's podium presentation entitled "Iontophoretic Transdermal Drug Delivery System Using a Conducting Polymeric Membrane", to be given at the 2008 Annual AIChE meeting in Philadelphia. Dr Fan will discuss the latest developments in iontophoretic drug delivery systems, with a focus on the application of a porous polyaniline (PANI) membrane acting as a conducting polymeric membrane as well as an electrode, in an iontophoretic transdermal drug delivery (TDD) system. This novel technique makes it possible to deliver two or more active pharmaceutical ingredients from a single delivery system.

The presentation will be given at 4:05pm, Tuesday, November 18, 2008 in Room Franklin 3 at the Marriott Hotel, Philadelphia, PA.

Particle Sciences is an integrated provider of drug development services. Particle Sciences focuses on emulsions, gels, particulates and drug/device combination products with additional specialized capabilities in topical and mucosal drug delivery. Through a full range of formulation, analytic, and manufacturing services, Particle Sciences provides pharmaceutical companies with a complete and seamless development solution that minimizes the time and risk between discovery and the clinic. The company was founded in 1991 and is headquartered in Bethlehem, Pennsylvania.
